EXPERIENCE

Website Developer | (2025- Present)

Devnestic Solutions.

- Specialized in designing responsive websites and mobile applications with a strong focus on user experience, usability, and modern design standards. Experienced in creating wireframes, user flows, interactive prototypes, design systems, dashboards, landing pages, SaaS platforms, and corporate websites. Collaborated closely with development teams to ensure seamless implementation while producing branding materials, marketing assets, and cohesive visual identities that enhanced user engagement and strengthened brand presence.

Projects.

Excellence Hub — Freelancing & Project Management Platform

- Developed a Laravel-based freelancing platform connecting buyers with companies and professional service providers.
 - Enabled buyers to post projects, define requirements, and submit project requests to suitable companies.
 - Implemented project management functionality to support project handling and collaboration between buyers, companies, and administrators.
 - Developed responsive and user-friendly interfaces for efficient project and requirement management.
 - Integrated dynamic backend functionality with a structured database-driven architecture.
-

One Ten Exporter — Responsive E-Commerce Website

- Developed a responsive Laravel-based e-commerce website for showcasing and selling products online.
- Implemented dynamic product listings, categories, product details, and intuitive navigation.
- Built responsive interfaces optimized for desktop, tablet, and mobile devices.
- Developed backend functionality for managing website content and product-related data.
- Focused on clean UI, usability, performance, and a smooth online shopping experience.

Skills

Technical skills

Proficient in PHP and Laravel with a strong understanding of MVC architecture, MySQL database management, CRUD operations, REST API development, authentication and authorization. Skilled in HTML5, CSS3, JavaScript, Tailwind CSS, and Bootstrap for developing responsive and user-friendly web interfaces. Familiar with Git and GitHub, API integration, debugging, database-driven application development, and writing clean and maintainable code.
